Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/814,234	Applicant(s) RIOUX, ANDRE	
	Examiner Chapman E. Jeanette	Art Unit 3635	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The final rejection has hereby been withdrawn /vacated. See interview summary. By a telephone interview with the attorney of record, it was discovered that the claim is replete with errors. Correcting the errors would change the scope of the claim. Hence the amendment of 5/25/07 has been entered. The indicated allowability for claims 13/14 has been withdrawn due to the multiple errors in new claim 14 and a new rejection has been drafted.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 14 is replete with redundancy and grammatical errors. See interview summary form. The first paragraph of claim 14 repeats itself in the second paragraph of the same claim. Further ".....the side apertures.....having ...four side portions..... and defining a bolt receiving aperture" has no clear meaning. There also exist a grammatical problem on lines 2-3.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3635

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14 and 16, as far as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Lange (5588274). Lange discloses a modular unit constructed and arranged to define a four sides box like structure wherein each side has planar portions 18 defining at least one side aperture 22; the side aperture includes a circular shape. The planar portions defines a plurality of side portions 24/25 protruding inwardly into the at least one side aperture and wherein each of said side portion defines a plurality bolt receiving apertures 26 thru the planar portions

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lange (5588274). The size and shape of the modular units and the apertures have been considered a matter of choice depending on the intended use of the structure. Applicant has merely claimed a four sided box with maybe but not really not oval type apertures.

Allowable Subject Matter

Claims 2-12 and 17-20 are allowable over the prior art of record.
